# Necklace Size Guide

## Why measure your necklace length:

Finding the right necklace size is important to ensure comfort and proper fit. It also enhances the overall aesthetic appearance when worn, complementing the neckline of clothing and accentuating the wearer's features. Additionally, knowing your necklace size prevents the necklace from being too tight, which can cause discomfort, or too loose, which may lead to the necklace falling off. This chart shows the total length of the necklace measured in either centimetres or inches (1" = 2.5cm). There are two easy ways to measure the desired necklace length.

## How to measure your necklace length:

### **Option 1: Measure the length of your favourite necklace:**

**Step 1:** Place your open necklace on a table

**Step 2:** Using the centimetre/inch edge of a ruler, measure from the outer edge of the clasp to the other end of the necklace.

### **Option 2. Measure for necklace lengths on your body**

**Step 1:** Stand before a mirror. Hold a flexible measuring tape, a piece of long string or ribbon around your neck joining both ends at the point where you want your necklace to rest. If you would like to wear a pendant on that chain, then consider the additional pendant length when considering the endpoint of the chain.

**Step 2:** Note the length in centimetres or inches (use a ruler to measure the string/ribbon).

## What necklace should you wear?

Before you choose a necklace length, you should know that the exact resting length of your necklace will vary with body type, height, neck and torso length. The look will also vary with your style and the necklines of the clothing you wear.

### **Personal style: The look and styling you are aiming for**

How you style your look will depend on the necklace-length position. Your choice of necklace designs and chain lengths will depend on this.

*Layering:* Everybody loves layering necklaces. One of the top rules of layering several necklaces is to layer them in graduating lengths.

*With or without a pendant?* Do you want to wear a pendant on your chain? If yes, then you will need to consider the total length of the chain plus the pendant length.

### **Necklines and necklace lengths:**

The right length necklace makes all the difference in complementing the neckline styles of your clothing. Short necklace lengths are best worn with scoop necks and medium chains with organic pendants look great with plunging-neckline dresses and tops. Medium and long-length necklace chains are stylish with high necklines.

## Different necklace names and lengths:

### **16-Inch Necklace Length:**

*The Fit:* Sits gently around the base of the neck on top of the clavicle

*Wear With:* V-necks, scoop necks, boat necks, and button-up blouses

### **18-Inch Necklace Length:**

*The Fit:* Falls just below the collarbone

*Wear With:* Complements most necklines

### **20-Inch Necklace Length:**

*The Fit:* Sits a few inches below the collarbone

*Wear With:* Pairs well with most necklines

### **22-Inch Necklace Length:**

*The Fit:* Falls in the middle between the clavicle and bustline

*Wear With:* Pairs well with low or plunging necklines

### **24-Inch Necklace Length:**

*The Fit:* Hits at or just above the bustline

*Wear With:* Looks lovely layered with other necklaces

### **30-Inch Necklace Length:**

*The Fit:* Falls just below the bustline

*Wear With:* Higher necklines like boat necks, cowl necks, and turtlenecks
